

Every Stone Has A Story Video Notes – Part 2

Fill in this chart with the characteristics and other details about each class of rocks discussed in the film.

Sedimentary Rock

Think: How can a rock with shells in it end up in a desert?

Igneous Rock

Think: Why would the core of an ancient volcano still stand when all the rock around it has eroded away?

Metamorphic Rock

Think: Why does a cliff of metamorphic rock look contorted?
